Education

Georgia Southern University

Bachelor of Science in Computer Science

GPA: 3.4 / 4.00

Graduation: December 2025

Awards: Dean's List for 3 Semesters

Relevant Coursework: Data Structures, Algorithm Design & Analysis, Database Systems, Operating Systems, Computer Architecture, Software Engineering, Distributed Systems, Computer Security

Technical Skills

- **Languages:** Python, Java, JavaScript, HTML, CSS
- **Frameworks/Libraries:** Django, Spring Boot, React, OpenCV, Tesseract, TensorFlow, Keras
- **Databases/Tools:** MySQL, Git, Maven, REST APIs, Agile/Scrum

Work Experience

- **Software Engineering Intern** *Sports Media Inc.* May 2025 – Aug 2025
 - Optimized SEO/AEO strategies, boosting website visibility and engagement.
 - Collaborated on agile teams to design, develop, and deploy production-level software
 - Developed and optimized user-friendly, responsive websites to ensure peak performance, accessibility, and reliability across all major devices and browsers.
- **Grill Cook** *Cracker Barrel Old Country Store* May 2024 - Present
 - Delivered high-quality service in a fast-paced environment while training staff and optimizing workflows, strengthening teamwork, time management, and leadership
- **Scoreboard Operator** *Lakepoint Sports* June 2018 – July 2019
 - Delivered high-quality service in a fast-paced environment while training staff and optimizing workflows, strengthening teamwork, time management, and leadership

Projects

- **NoteStream**
 - A full-stack study platform with notes, quizzes, and flashcards using **Java**, **JavaScript**, **HTML**, and **CSS**.
 - Built a friends system for real-time collaboration, requests, and shared editing.
 - Implemented secure user management and dynamic interactive study tools, including quizzes with instant scoring and flashcards.
- **Library Management System**
 - Full-stack Library Management System with Django, **MySQL**, **React**, and JavaScript for efficient book, member, and loan management.
 - Implemented CRUD operations, search, and queries to improve data handling and reporting
- **Real-Time OCR System (Python, OpenCV, Tesseract)**
 - Developed a real-time OCR system using Python, OpenCV, and Tesseract to detect and highlight text in live video frames.
 - Implemented bounding boxes and confidence scoring for detected words, demonstrating practical computer vision skills.

Activities

- **Scholarship Chair, Theta Xi** Aug 2022 – Aug 2023
 - Improved chapter GPA by 20% by organizing tutoring sessions and academic programs for over 40 members.
- **Member, Association for Computing Machinery (ACM)** May 2025 – Present
 - Actively participated in ACM workshops, technical presentations, and coding competitions to enhance knowledge and practical skills in computing.
